

SPECIALISED CONTAINER RANGE

Open Top Shipping Containers

Shipping Containers Australia supply high quality used Open Top Containers that are available in both Hard and Soft Tops.

Our Soft Top units are available in 20ft and 40ft sizes and feature completely removable tarpaulins. The tarpaulins are attached using a steel wire running through eyelets in the tarp that go over rings that are welded to the container.

Our 20ft Hard Top units feature a watertight steel roof that can be easily removed with either a crane or forklift in a few easy steps. The upper door header can also be swung out.

Bulky or heavy cargo can be stowed conveniently and safely while still retaining the comprehensive protection of a standard container during transport. For more details please call us as our advisors are more than happy to assist you.
